Insurance cover can help against theft or damage of your bicycle

I am planning to sell my car. How can I transfer my insurance to the purchaser of my vehicle?

To transfer the insurance, the new owner can approach the insurance company for name transfer endorsement with your consent (request letter from the previous insured) along with the proof of vehicle transfer.

Recently, I purchased a Firefox Origin 700C bicycle. I'm looking for some affordable bicycle insurance which will cover protect me from losses incurred due to theft and accident?

A bicycle insurance policy is an essential piece of kit for every cyclist. There are a handful of companies which offer this product in India. You should look at a policy that covers as many features as possible that a bicycle enthusiast, whether riding road, mountains or commuting, would find useful. It should provide protection if your bicycle is vandalised, damaged or stolen or if you hurt yourself while riding the cycle. Some bicycle insurance products would also cover the accessories of your cycle in case of theft and damage, which can be quite expensive to replace on its own.
